Full Stack Dev & Technical Lead,
COG Marketing

PROFILE

Junior Full Stack Developer at a Sydney marketing agency, building and maintaining **WordPress and Shopify** websites alongside design and SEO teams. Games Development graduate (Distinction) from UTS, with a background across web, mobile and game development. I build sites that clients can update themselves, and use AI tools deliberately to work faster without cutting corners. Personal Projects at [dylan-archer-dev.com](#).

WORK EXPERIENCE

Junior Full Stack Developer / COG Marketing

Aug 2025 - Present

- Build new WordPress websites and maintain and update existing client sites, working alongside the design and SEO teams.
- Build and update Shopify stores for e-commerce clients.
- Structure builds so non-technical clients and staff can update content themselves through the CMS, rather than relying on hard-coded changes that need a developer.
- Provide managed IT support for clients, including email, domains and website hosting.

Community Tech Support Assistant / Youngster.co

Mar 2025 - Aug 2025

- Provided personalised technology assistance to seniors, helping them navigate smartphones, tablets and computers.

Crew Member (Casual) / McDonald's Menai

May 2020 - Aug 2025

- Prepared food orders efficiently in a fast-paced kitchen, consistently meeting quality and hygiene standards.
- Supported team operations by maintaining cleanliness, restocking supplies and following food safety protocols.

AI-ASSISTED DEVELOPMENT

- Use AI tools daily to speed up development, debugging and maintenance work across WordPress and Shopify projects.
- Decide task by task when AI is the right tool, and when a job is faster or safer done by hand.
- Manage context deliberately: breaking work into focused tasks and giving the model the right code, constraints and requirements to get reliable results.
- Review and test AI-generated code before it ships, and stay responsible for the result.
